Education

University of San Diego — San Diego, CA

BS in Computer Science — *May 2025*

Experience

Coframe — San Francisco, CA

Front-end Developer (Contract) — *February 2026*

- Built **30+** website variants using Claude AI development tools, accelerating front-end production and enabling rapid iteration for **conversion rate optimization** (CRO) testing
- Leveraged Claude to cut average variant build time by **~30%**, increasing capacity for A/B testing across client sites
- Supported **4** client websites simultaneously, delivering rapid front-end changes

Haystacks AI — San Francisco, CA

Software Engineering Intern — *May - August 2024*

- Automated an ETL pipeline using Playwright and Pandas to collect and aggregate campaign data from sources without APIs, saving **10+** hours of work per week
- Engineered LLM prompts to personalize outreach emails based on developers' GitHub activity, doubling response rates
- Built Make automations connecting GitHub, Slack, and internal analytics tools to trigger personalized outreach campaigns, automating the end-to-end workflow for **500+** developer prospects monthly

Guardant Health — Palo Alto, CA

Security Validation Intern — *May - August 2023*

- Executed security assessments across **300+** systems and applications using automated testing tools (NodeZero, BurpSuite, Metasploit)
- Identified and documented **20+** vulnerabilities including 5 critical-severity issues, directly contributing to improved security posture for healthcare infrastructure handling sensitive patient data

Projects

Portfolio - JavaScript, HTML, CSS — Live | Github

Designed and built a responsive, mobile-first portfolio site with custom animations using jQuery and Motion

Mindestry - React.js, Express.js, MongoDB — Live | Github

Designed and developed a mental health web application as the sole developer, utilizing OpenAI's GPT API to provide users tools for changing negative thoughts into positive ones

Senior Project - Flask, PowerBI — Github

Collaborated in a team of four to create an admin dashboard analyzing student dining behavior, delivering actionable insights to campus administrators to improve dining services and student outcomes

Message Board - Python, PostgreSQL, HTML/CSS — Github

Worked in a team of four to build a full-stack message board with user posts and comments, admin moderation tools, and encrypted password storage

Skills

Languages: JavaScript, HTML, CSS, Python
Frameworks & Libraries: React.js, Express.js, jQuery
